DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim [WO 99/41853].

Regarding claims 1 and 7, Kim discloses a CDMA communication system, which provides a dedicated control channel capable of efficiently communicating control messages between a base station and mobile station. Kim further discloses a means for storing the data generated by the terminal and further segmenting the data in the core unit to include payload of pre-determined size. Kim further discloses a method of selecting a dedicated control channel and a packet traffic channel/supplemental channel. Kim further discloses a method of packaging the core unit into a RLP frame. See Fig.5, abstract, summary of invention, page 17, lines 10-16, page 21, lines 11-15.

Regarding claims 2 and 8, Kim further discloses a method of selecting the core unit and prepending a header to the core unit, the header comprising of sequence number and payload length. See figures 2A-2C, page 21, line 19 – page 23, line 2.

Regarding claims 3,5,9, and 11, Kim further discloses a method where a field in the header indicates whether the contents are for the dedicated control channel or for the supplementary channel of the radio link.

Art Unit: 2682

Regarding claims 4,10, Kim further discloses a method of concatenating a plurality of core units and prepending the header to the core unit. See figures 2A-2C, summary of invention and page 21, line 19 – page 23, line 2 and page 1, lines 12-19.

Regarding claims 6 and 12, Kim further discloses a method of appending the header and the core unit to the concatenated core units. See figures 2A-2C, summary of invention and page 21, line 19 – page 23, line 2 and page 1, lines 12-19.

Response to Arguments

3. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies i.e., to use the dedicated control channel for transmitting user data even there exists a presently active radio link in use by the mobile station are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In addition the applicant is drawn to the reference Kim [WO 99/41853] where it is disclosed that in exceptional cases the dedicated control channel maybe used together with the voice traffic channel for high quality service. See page 12, lines 8-18.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2682

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
